

# DVB-S FTA Receiver with PVR

This digital video broadcasting satellite receiver allows users to receive unencrypted satellite television and radio broadcasts. It features an electronic program guide, multiple language support, and various connectivity options.

## Product Overview

### Professional DVB-S Receiver with PVR

This Digital Video Broadcasting Satellite (DVB-S) Free-To-Air (FTA) receiver is designed for efficient satellite signal reception and recording. It supports advanced video decoding for both MPEG-2 and MPEG-4 formats, ensuring compatibility with a wide range of broadcasts. With integrated Personal Video Recorder (PVR) functionality, users can easily manage time-shifting and scheduled recordings, making it a reliable solution for professional satellite content management.

## Technical Specifications

### Connectivity Ports

- HDMI Output
- USB Port
- Composite Video Output

### Video Decoding Standards

MPEG-2, MPEG-4

## Features

### Recording Features

PVR Functionality • Time-Shifting • Scheduled Recording

### User Interface & Support

- Electronic Program Guide (EPG)
- Multiple Language Support
- Intuitive Menu Navigation
- Remote Control Operation
