

DVB-S2 Compatible Digital Set-Top Box

This digital set-top box receives and decodes digital television signals. It supports DVB-S2, providing access to digital broadcast channels and interactive services.

Overview

DVS-28 Digital Set-Top Box

The DVS-28 is a versatile, free-to-air digital set-top box designed to deliver high-quality broadcast entertainment. It supports both High Definition (MPEG-4 AVC/H.264) and Standard Definition decoding, ensuring compatibility with a wide range of content. With a durable 230mm metal housing, it is built for reliable performance in home entertainment setups.
