

# DVB-S/S2 Digital Satellite Finder Meter

This digital satellite finder supports both DVB-S and DVB-S2 standards. It is designed for easy and precise satellite signal alignment.

## ADDITIONAL IMAGES

## Product Overview

Detailed layout of the satellite finder, including LCD screen, navigation buttons, and connectivity ports.

## Professional Satellite Signal Alignment

This digital satellite finder is a portable, high-precision instrument designed for the accurate alignment of satellite dishes. It supports both DVB-S and DVB-S2 standards, providing real-time signal strength and quality metrics to ensure optimal reception. Equipped with a user-friendly interface, built-in compass, and USB connectivity for software updates, it is an essential tool for professional installers and technicians.

## Technical Specifications

Frequency Range	2150 MHz
Operating Voltage	13-18V DC
Supported Standards	DVB-S, DVB-S2

## Features

### PACKING AND DELIVERY

Professional packaging and logistics preparation ensures the product reaches you safely.

#### Core Functionalities

- Real-time signal strength and quality monitoring
- Built-in compass for directional assistance
- USB interface for data transfer and software updates
- Audio feedback via integrated buzzer
- Visual indicators for 13V/18V power and 22KHz tone

#### Performance Indicators

**22 KHz**

Tone Support

**18 V**

Max Power Input

## Compliance

#### Certifications

CE Certified
