

# DVB-S/S2 Digital Satellite Finder with Spectrum Analyzer

This digital satellite finder supports DVB-S and DVB-S2 standards, ensuring compatibility with a wide range of satellite systems. It features a spectrum analyzer and displays signal strength, quality, and other relevant parameters on its LCD screen.

## ADDITIONAL IMAGES

## Overview

Handheld satellite meter featuring a high-resolution LCD screen, navigation buttons, and integrated LED light for field use.

## PACKING AND DELIVERY

Secure packaging and delivery preparation for international shipping.

## Professional Satellite Signal Alignment

This handheld digital satellite finder is an essential tool for technicians and installers, designed to streamline the alignment of satellite dishes. Supporting both DVB-S and DVB-S2 standards, the device offers precise signal monitoring through a built-in spectrum analyzer and high-resolution LCD screen. It is engineered for field use with a rugged design, integrated LED light for low-light conditions, and a rechargeable battery for extended operation.

## Technical Specifications

Rugged design suitable for professional satellite installation and alignment in various environments.

Input Frequency Range	2150 MHz
Power Supply	DC 12V 2000mA
Input Level	-65 to -25 dBm

## Key Features

### Protocol Support

- 0/22KHz
- DiSEqC 1.0
- USALS

### Additional Features

Spectrum Analyzer • Automatic Power Cable Check • Built-in LED Light

Supported Standards	DVB-S, DVB-S2, Unicable LNB
---------------------	-----------------------------

## Display & Interface

### Displayed Metrics

<b>1 %</b> Signal Strength	<b>1 %</b> Signal Quality
-------------------------------	------------------------------

### Interface & Connectivity

Feature	Description
Display	LCD Screen
Data Port	USB 2.0
Functions	Software update, Satellite parameters management
