

DVB-T Digital TV Antenna

This DVB-T antenna receives digital terrestrial television signals. It has an input impedance of 75 Ohm and a VSWR of less than 2.0.

Product Overview

High-Performance DVB-T Reception

This DVB-T Digital TV Antenna is engineered to provide reliable signal reception for digital terrestrial television. Designed with a compact and modern form factor, it integrates seamlessly into various installation environments. It offers consistent performance across the UHF frequency band, ensuring clear signal quality for your broadcasting needs.

Technical Specifications

Frequency Range	470-860 MHz
Input Impedance	75 Ohm
