

DVB-T Digital TV Tube Antenna

This tube antenna is designed for receiving digital terrestrial television signals. It has a compact design and stable base for easy placement.

Product Overview

Compact Digital Terrestrial Reception

This tube-style antenna utilizes advanced SMD circuit technology to provide excellent signal reception for digital, Freeview, and analog TV signals. Designed for indoor environments, the unit features a sleek black finish and a space-saving footprint. It offers versatility through compatibility with HDTV signals and DAB/FM radio broadcasts.

Technical Specifications

Amplifier Type	Built-in high gain and low noise
Circuit Technology	SMD
Interference Shielding	Yes

Connectivity

Power Supply

- DTV set-top box
- Separate power adapter

Compatibility

Supported Signals	DVB-T, HDTV, DAB, FM Radio, Analog TV
-------------------	---------------------------------------

Design

Design Features

Space-saving • Tube design • Shiny black finish
