

DVB-T HD Digital TV Receiver

This is a high-definition digital video broadcasting receiver for terrestrial signals (DVB-T). It features MSD7818 chipset for enhanced performance and supports HD FTA channels with its compact 168mm width.

Product Overview

High-Definition Terrestrial Receiver

This DVB-T HD Digital TV Receiver offers reliable signal reception for both standard and high-definition terrestrial broadcasts. Engineered with support for MPEG2 and MPEG4 AVC H.264 standards, it ensures broad compatibility and clear visual performance up to 1080P resolution. With integrated features like a 7-day EPG, PVR functionality via USB 2.0, and parental controls, it provides a comprehensive viewing experience for professional and consumer installations.
