Product Overview

Professional Signal Alignment Tool

This portable signal finder is designed for the precise alignment and optimization of DVB-T and DVB-T2 digital terrestrial television antennas. It features a clear LCD display that provides real-time feedback on signal strength and quality, ensuring accurate installation. With built-in audio alerts and adjustable backlight, it simplifies the setup process for both professional installers and home users.

Technical Specifications

PACKING AND DELIVERY

Standardized packaging for secure delivery.

Key Functions

- Multi-standard demodulation
- Signal decoding
- Channel scanning
- Signal locking

Frequency Range	170-230MHz (VHF) / 470-862MHz (UHF)
Supported Standards	DVB-T, DVB-T2

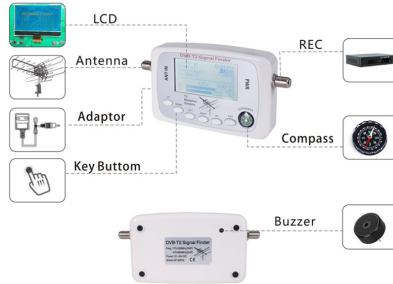

Power & Connectivity

Power Input

12 V DC
Min Voltage

24 V DC
Max Voltage

Display & Interface

Device interface and key component layout.

Display Features

- LCD signal strength display
- LCD signal quality display
- Controllable LCD backlight

Audio Feedback

Yes

Certifications

Regulatory compliance and quality certification.

Compliance

CE Certified
