

DVD±R Recordable Media

DVD±R discs are a type of recordable media used for storing digital information. These discs can store data, video, and audio files and are compatible with most DVD burners and players.

Product Overview

High-Capacity Optical Storage

These DVD±R recordable media discs provide a reliable solution for archiving data, video, and audio files. Designed for professional and personal use, these discs are available in various speeds and surface finishes to meet specific project requirements. Each unit comes in a convenient 100-piece spindle pack, ensuring organized storage and protection against dust and scratches.
