

# DWDM Optical Add Drop Multiplexer Module

This wavelength multiplexer achieves optical add or drop at an ITU wavelength. The module uses thin film coating technology and a non-flux metal bonding micro optics packaging design.

## Overview

### High-Performance DWDM Multiplexing

The 100G DWDM 4+1CH-Demux Module is a precision-engineered optical component designed for dense wavelength division multiplexing (DWDM) systems. It provides 4 dedicated channels plus an additional upgrade port (UPG) to facilitate flexible network expansion and increased bandwidth capacity. This module is an essential solution for optimizing communication network infrastructure.

## Technical Specifications

### Supported Channels

- CH34
- CH35
- CH36
- CH37

### Module Type

100G • DWDM • Demux

### Channel Configuration

4 Channels + 1 Upgrade Port (UPG)

## Identification

### Part Number

DWDM 4+1CH-Demux

### Serial Number

14081899002
