

DY100 Step-Through Motorcycle

The DY100 is a step-through motorcycle equipped with a four-stroke engine and a semi-automatic transmission. It includes a front basket, durable frame, and rear carrier, making it suitable for urban commuting and light transportation.

Overview

Urban Utility Motorcycle

The DY100 is a versatile step-through motorcycle engineered for efficient urban commuting and light-duty transportation. Featuring a robust four-stroke engine and a user-friendly semi-automatic transmission, it provides a balance of reliability and ease of operation. Practical design elements, including a front utility basket and a rear carrier, make it an ideal choice for daily errands and small-scale logistics.
