Product Overview

Reliable Circuit Protection

The DZ47-63 3P 16A Miniature Circuit Breaker is designed for robust protection against overloads and short circuits in electrical systems. Engineered for versatility, it is suitable for lighting distribution systems in industrial enterprises, commercial districts, high-rise buildings, and residential dwellings. This unit ensures safety and reliability, conforming strictly to international IEC60898 standards.

Technical Specifications

Rated Current

16 A

Rated Current

Number of Poles	3
Rated Voltage	400 V
Frequency	50 Hz

Compliance & Standards

Standards Compliance	IEC60898, CE
----------------------	--------------

Application

Suitable Environments

- Industrial enterprises
- Commercial districts
- High-rise buildings
- Residential dwellings
- Lighting distribution systems
