

E11 Base LED Bulb

This LED bulb features high quality and high lumens. It has a standard E11 base and a translucent cover that diffuses light.

Product Overview

Advanced LED Lighting Solution

This E11 base LED bulb utilizes original patented technology to deliver high luminous efficiency with minimal lumen depreciation. Designed for uniform 360-degree illumination, the bulb features a flicker-free, eye-safe design that ensures soft and consistent light output. Its optical PC lamp-house achieves up to 90% light transmittance, while the integrated convection cooling system effectively manages heat to significantly extend the product's operational lifespan.

Technical Specifications

Base Type	E11
Beam Angle	360 degrees
Light Transmittance	90 %

Features

Performance Metrics

90 % Transmittance	360 deg Lighting Coverage
------------------------------	-------------------------------------

Key Features	Flicker-Free, Uniform Illumination, Constant Current Driver, Heat Dissipation Design
