

E11 LED Refrigerator Light Bulb

This LED light bulb is designed for refrigerators and other compact lighting applications. It features an E11 or similar small Edison screw base and emits a cool white light.

Product Overview

Compact LED Lighting Solution

This E11 LED light bulb is specifically engineered for refrigerator and compact lighting applications where space is limited. Designed for energy efficiency and extended service life, it serves as a direct, high-performance replacement for traditional incandescent bulbs. The unit features a durable white cylindrical body with a clear plastic dome, ensuring reliable illumination in cool white tones.

Technical Specifications

Light Color

Cool White

Design Features

- Compact cylindrical body
- Clear plastic dome
- Energy efficient LED technology
- Long operational lifespan

Base Type

E11

Operating Voltage

12V, 24V
