

E12 LED Corn Bulb

This LED corn bulb is designed for bright, energy-efficient lighting. It features a standard E12 base and provides 360-degree illumination, making it suitable for various fixtures.

Overview

High-Efficiency LED Corn Bulb

This E12 LED corn bulb is engineered to deliver bright, energy-efficient lighting suitable for both residential and commercial applications. Its unique design features numerous LED chips arranged in a corn-like configuration, providing consistent 360-degree illumination. Built with a heat-dissipating copper-colored band, this bulb ensures enhanced durability and reliable performance for long-term use.

Technical Specifications

Base Type	E12
Beam Angle	360-degree
Construction Features	Heat-dissipating band, Clear cover, Spiral design

Application

Suitable Environments

- Residential Lighting
- Commercial Lighting
