

# E14 LED Bulb with Plastic and Aluminum Housing

This energy-efficient LED bulb is designed for residential and commercial lighting. It features a durable plastic and aluminum construction for enhanced heat dissipation and long life.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Decorative Lighting

This E14 LED bulb is engineered for both residential and commercial lighting applications, offering an energy-efficient solution for various decorative fixtures. Featuring a robust combination of plastic and aluminum, the housing ensures superior heat dissipation and extended product longevity. Its design provides bright, uniform illumination with a wide beam angle, making it an ideal choice for chandeliers, sconces, and other accent lighting needs.

## Technical Specifications

### Key Features

- Energy-efficient LED technology
- Enhanced heat dissipation design
- Wide beam angle for uniform light distribution
- Flame-shaped decorative aesthetic

<b>Socket Compatibility</b>	E14
<b>Housing Materials</b>	Plastic, Aluminum

## Application

### Ideal Applications

Chandeliers • Sconces • Decorative Fixtures • Residential Lighting • Commercial Lighting
