

E26/E27 LED Light Bulb for Civil Applications

This high-efficiency LED lighting is designed for civil applications. It features a robust heat sink and utilizes a standard E26/E27 screw base for easy installation.

Overview

High-Efficiency Civil Lighting Solution

This LED light bulb is engineered for high-efficiency performance in diverse civil applications, ranging from residential to commercial and industrial environments. It features a robust heat sink design, ensuring optimal thermal management and a significantly extended operational lifespan. With its standard E26/E27 screw base, the bulb offers seamless installation, while the advanced LED array provides uniform, bright illumination with minimal power consumption.

Technical Specifications

Base Type	E26/E27 Screw Base
Thermal Design	Robust heat sink for optimal thermal management
Key Features	High Efficiency, Low Power Consumption, Uniform Illumination, Extended Lifespan

Applications

Suitable Environments

- Residential Lighting
- Commercial Lighting
- Industrial Solutions
