

E27 UV-C Mercury Lamp for Sterilization

This ultraviolet mercury lamp features an E27 screw base for easy installation. It emits UV-C radiation at 254 nm for effective inactivation of microorganisms in air and water.

Product Overview

High-Efficiency Sterilization

This E27 UV-C mercury lamp is expertly engineered for professional sterilization and disinfection applications. By emitting powerful short-wave ultraviolet radiation at 254 nm, it effectively neutralizes bacteria, viruses, and various microorganisms. Featuring a durable quartz glass construction, this lamp ensures optimal UV transmittance for reliable performance in air purifiers, water treatment systems, and surface disinfection environments.

Technical Specifications

Base Type	E27 Screw Base
Wavelength	254 nm
Material	Quartz Glass

Applications

Recommended Applications	Air Purification, Water Treatment, Surface Disinfection
--------------------------	---

Safety Information

Safety Caution	Avoid direct exposure to UV-C light during operation.
----------------	---
