

E40 Ceramic Lamp Holder

This E40 lamp holder is designed for high-wattage applications. Its robust ceramic construction ensures high-temperature resistance and includes a metal threaded socket for secure lamp installation.

Overview

High-Performance E40 Ceramic Lamp Holder

This E40 lamp holder is engineered specifically for high-wattage lighting applications in industrial and commercial environments. Its robust ceramic construction ensures excellent high-temperature resistance and long-term durability. Featuring a reliable metal threaded socket, it provides secure lamp installation and consistent electrical contact for demanding lighting fixtures.

Technical Specifications

Base Type	E40
Material	Ceramic
Socket Mechanism	Metal Threaded

Key Features

Performance Highlights

1 Grade

High-Temp Resistance

Suitable Applications	Industrial Lighting, Commercial Lighting, High-Wattage Fixtures
