

Earth Auger Power Tool

This machine-tool is designed for drilling holes in various materials. Its robust construction and high-torque motor ensure reliable performance even in demanding applications.

Product Overview

Professional Earth Drilling Capability

The SMEA430 is a powerful and efficient machine-tool designed for drilling holes in various materials. Its robust construction and high-torque motor ensure reliable performance even in demanding applications. Featuring a durable auger bit for effective material removal, it offers exceptional drilling power and versatility for construction, landscaping, and agricultural work.

Primary Applications

Construction, Landscaping, Agriculture

Key Features

Operational Advantages

- High-torque motor for demanding tasks
- Durable auger bit design
- Ergonomic handle configuration
- Precise hole creation capability

Performance Highlights

430 ID
