

Earth Leakage Circuit Breaker 63A 30mA

This earth leakage circuit breaker protects against electric shock and fire hazards caused by ground faults. It has a test button, a rated current of 63A, and a tripping current of 30mA.

Overview

Reliable Earth Leakage Protection

This Earth Leakage Circuit Breaker (RCCB) is engineered to provide critical safety by detecting and interrupting ground faults, protecting both personnel from electric shock and equipment from potential fire hazards. Designed for versatility, it operates effectively in both residential and industrial electrical systems. Featuring a user-friendly test button for routine safety checks, this device ensures consistent and reliable performance in maintaining electrical circuit integrity.

Technical Specifications

Rated Current

63 A

Rated Current

Tripping Current

30 mA

Tripping Current

Safety Features

- Ground fault protection
- Electric shock prevention
- Fire hazard mitigation
- Integrated test button

Operating Voltage

230 V

Certifications

Compliance

CE Certified
