

Earth Leakage Circuit Breaker

This earth leakage circuit breaker provides reliable protection against earth faults. It is suitable for use in a variety of electrical systems to ensure safety and compliance.

Product Overview

Industrial Protection Solution

This high-quality earth leakage circuit breaker is engineered for demanding industrial and commercial electrical environments. It provides reliable, precise protection against earth faults, effectively preventing electrical hazards and minimizing potential equipment damage. Designed with robust construction and ease of installation, this unit ensures safety and compliance with international standards in various electrical systems.

Technical Specifications

Rated Current	40 A
Rated Voltage	240/415V~
Rated Residual Operating Current	30 mA
Model Identifier	F 364

Compliance & Standards

Standards Compliance	SS 4732
----------------------	---------

Features

Key Features

- Robust industrial-grade construction
- Precise tripping characteristics
- Easy installation design
- Integrated test button functionality
