

Earth Moving Excavator

This is construction machinery. It is an earth moving excavator.

Overview

High-Performance Earth Moving Excavator

This robust earth moving excavator is engineered for demanding construction and excavation projects. It combines powerful hydraulic performance with precise control systems to maximize operational efficiency on job sites. Designed for durability and reliability, this machine provides the versatility needed for digging, trenching, and material handling in various soil conditions.

Performance

Rated Power

150 kW

Engine Power

Operating Weight	22000 kg
------------------	----------

Bucket Capacity	1.2 m ³
-----------------	--------------------

Technical Specifications

Max Digging Depth	6500 mm
-------------------	---------

Max Dump Height	6800 mm
-----------------	---------

Travel Speed	5.5 km/h
--------------	----------

Features

Key Features

- Heavy-duty reinforced boom and arm
- Ergonomic operator cabin with climate control
- Advanced hydraulic system for smooth operation
- High-torque swing motor
- Multi-function digital display monitor

Compliance

Certifications	ISO 9001, CE Certified, ROPS/FOPS Compliant
