

Earthmoving Bulldozer for Construction

This bulldozer is designed for earthmoving and construction applications. It features a large blade and a comfortable operator cabin.

Overview

Heavy-Duty Earthmoving Performance

This bulldozer is engineered specifically for demanding earthmoving and construction applications. It combines a powerful engine with a robust hydraulic system and durable tracks to ensure optimal performance across challenging terrains. Designed for efficiency, the large blade facilitates rapid material pushing and grading, while the operator cabin prioritizes visibility and comfort for long shifts.

Key Features

Equipment Highlights

- Powerful engine for high torque
- Robust hydraulic system
- Durable tracks for all-terrain mobility
- Large capacity grading blade
- Ergonomic operator cabin

Primary Applications

Site Preparation, Road Construction, Mining Operations, Earthmoving
