Overview

Professional Retail Loss Prevention

This RF 8.2MHz hard tag is a highly cost-effective security solution designed for textiles, clothing, and accessories. Featuring a durable ABS construction and a smooth surface to protect delicate fabrics, it provides reliable anti-theft protection that is easy to operate and fully recyclable. Its robust magnetic locking mechanism and high-quality internal components ensure consistent performance in busy retail environments.

Technical Specifications

Operating Frequency

8.2 MHz
RF Frequency

58 KHz
AM Frequency

Unit Dimensions	45mm Diameter x 22mm
Material	High-quality ABS plastic
Locking Mechanism	Magnetic Locking

Product Features

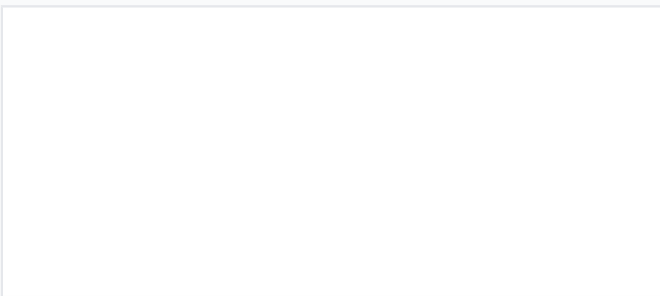

Simple and professional application process for retail staff.

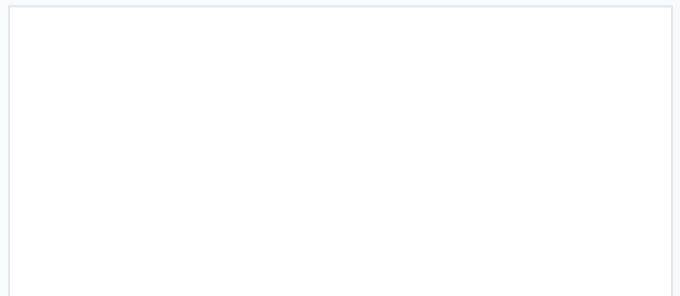

Key Features

- Reusable design for long-term cost savings
- Smooth surface prevents damage to clothing
- Customizable pin lengths available
- Easy to operate and recycle
- Compatible with multiple sizes for optimized detection

Durability & Quality

Our tags use high-quality new materials and reinforced internal iron props for superior security.

Engineered for toughness: the tag remains intact even under 135kg of pressure or heavy impact.

Impact and Pressure Resistance

The tag is engineered to remain intact even under extreme stress. It can withstand being thrown hard against surfaces and remains functional even when subjected to weights of nearly 135kg, ensuring it cannot be easily defeated by manual force.

Internal Build Quality

- High-quality new raw materials (no recycled content)
- Strong iron prop internal lock
- High-performance ferrites available in different lengths

Available Variations

Available in various sizes to optimize detection effectiveness for different retail environments.

Available Sizes

Model Style	Diameter
Golf Tag	63mm
Golf Tag	53mm
Mini Dome	45mm
