Product Overview

Reliable Power for ECG Diagnostics

This replacement battery pack is specifically engineered for compatibility with select electrocardiograph equipment. Utilizing Ni-MH technology, it provides the consistent voltage and capacity required for reliable operation in clinical environments. Designed as a direct replacement part, it ensures your diagnostic equipment remains powered and ready for patient assessments.

Technical Specifications

Battery Chemistry	Ni-MH (Nickel-Metal Hydride)
Voltage	9.6 V
Capacity	2000 mAh
Dimensions (L x W x H)	115 x 145 x 52 mm
Weight	235 g

Compatibility

Compatible ECG Machines

- FX-2155
- FX-2111

Safety & Handling

Safety Guidelines	No Short Circuiting, Avoid Physical Shock, Do Not Drop, Use Specified Equipment Only
