

Edge Banding Machine for Woodworking

This woodworking machine is designed for applying edge banding to panels. It features adjustable controls, pneumatic operation, and a worktable for precise material positioning.

Overview

Industrial Precision Edge Bander

The JF-350D is a high-performance edge banding machine engineered for professional woodworking environments. It provides precise application of edge materials to panel surfaces, ensuring a clean and durable finish. Designed with industrial-grade construction, this machine features intuitive pneumatic controls and a digital interface for consistent production quality.

Technical Specifications

Model	JF-350D
Machine Type	Straight line edge bander

Key Features

Control System

- Digital display
- Multi-button control panel
- Adjustable fences
- Adjustable outfeed support

Safety Equipment	Emergency Stop Button, Pneumatic Controls, Industrial Construction
