Product Overview

Automated Cake Cup Production

The Edge-Curling Cake Cup Forming Machine offers a simple, flexible, and efficient solution for manufacturing disposable flanging cups. Utilizing compressed air and advanced servo-driven technology, this machine ensures fully automated, high-quality production with smooth, well-proportioned cup bodies. Its energy-efficient and quiet operation makes it an ideal choice for modern, high-volume production environments.

Technical Specifications

| | |
|------------------|--|
| Production Speed | 40 cups/min |
| Control System | PLC Control, Touch-screen Interface, Mitsubishi Servo System |
| Mold Capacity | 2 sets/machine |
| Drive Mechanism | Ball screw drive with Japanese THK guide rails |

Key Features

Supported Cup Shapes

- Round
- Rectangular
- Square
- Oval

Operational Benefits

Fully Automatic • Energy Saving • Quiet Operation • Automatic Counting

Labor Efficiency

4 units

Machines per operator

8 molds

Total molds per operator
