

# EEC Approved Electric Scooter with Bosch Motor

This electric scooter is EEC approved and features a Bosch motor, lithium battery, and front and rear disk brakes. It has 12-inch tires, LED lights, and an LCD meter.

## ADDITIONAL IMAGES

## Overview

### Eco-Friendly Urban Mobility

This EEC-approved electric scooter offers a high-performance solution for urban commuting, powered by a reliable Bosch motor. Designed for efficiency and safety, it features a durable lithium battery for extended range and responsive front and rear disc brakes. With its modern aesthetic and practical components like LED lighting and a digital display, this moped provides a convenient, cost-effective alternative to traditional gasoline vehicles.
