

Egg Hatching Incubator with Digital Control

This incubator is designed for hatching eggs with precise control over the environment. It includes a digital control panel, multiple shelves, and a water tray for humidity regulation.

Overview

Professional Egg Hatching Solution

This egg hatching incubator is engineered to provide a stable and controlled environment essential for successful incubation. Featuring a robust metal construction with an insulated design, it ensures consistent thermal regulation for various poultry egg types. The integrated digital control panel allows operators to precisely manage temperature and humidity levels, while the viewing window enables easy monitoring without disrupting the internal climate.

Technical Specifications

Construction Material	Sturdy metal
Control System	Digital control panel

Features

Key Features

- Digital temperature and humidity regulation
- Insulated door with viewing window
- Multi-shelf design
- Integrated water tray for humidity control

Suitable For	Poultry Eggs, Multiple Species, Controlled Environment
