

Eight-Seat Electric Patrol Vehicle

The eight-seat electric patrol vehicle is designed for security and surveillance applications. It features an open-air design with a protective roof and is equipped with safety features.

Overview

Eight-Seat Electric Patrol Vehicle

The LQX080 is a specialized electric patrol vehicle engineered for security, surveillance, and personnel transport. Its open-air design, combined with a protective roof, ensures excellent visibility and rapid accessibility for patrol staff. Powered by an electric powertrain, this vehicle offers quiet, emission-free operation, making it an ideal solution for parks, large campuses, and residential communities.
