

# Ejector and Cylinder Assembly for SMT Machines

This ejector and cylinder assembly is designed for SMT pick-and-place machines. It facilitates precise and repeatable ejection and actuation in automated electronics assembly.

## Product Overview

### Precision Ejector and Cylinder Assembly

This high-performance ejector and cylinder assembly is engineered for reliable operation in automated SMT machinery. Designed to work in tandem, the AME05-E1-PSL-16W ejector and SP2397W cylinder units provide consistent, repeatable actuation essential for high-precision manufacturing. These components are essential for maintaining uptime and accuracy in demanding automated assembly lines.

## Compatibility

### Compatible SMT Platforms

YV100A, YV100II, YV100X, YV100XE, YV100XG, YG200

## Technical Details

### Core Components

- AME05-E1-PSL-16W Ejector
- SP2397W Cylinder
- A040-4E1-50W Cylinder

## Ancillary Components

### Associated Solenoid Valve Specifications

Part Number	Function
KM1-M7163-30X	Vacuum Solenoid
KM1-M7163-20X	Blowing Solenoid
KM1-M7163-21X	Blowing Solenoid
KM1-M7162-20X	Buffer Solenoid
KV8-M7162-20X	Buffer Solenoid
