

Electric Actuated Zone Valve with Brass Body

This electric actuated zone valve features a brass body and an electric actuator for automated control of fluid flow. It is suitable for various applications including HVAC systems, domestic water systems, and industrial processes.

Product Overview

High-Performance Electric Actuated Zone Valve

This electric actuated zone valve is designed for precise and reliable control of fluid flow in diverse professional environments. Constructed with a durable brass body, it offers excellent corrosion resistance and long-term service life. The integrated electric actuator provides efficient open/close functionality, making it an ideal choice for HVAC systems, domestic water infrastructure, and industrial process control applications.

Technical Specifications

Compatible Media

- Water
- Glycol solutions
- Compatible industrial fluids

Body Material	Brass
Control Mechanism	Electric Actuator

Applications

Suitable Sectors	HVAC, Domestic Water Systems, Industrial Processing
