

# Electric Air Blower for Dust and Debris Removal

This blower is a versatile tool designed for various cleaning and drying tasks. It features a powerful motor that delivers high-volume air output, making it suitable for removing dust, debris, and leaves from hard-to-reach areas.

## Product Overview

### High-Performance Air Blower

This versatile electric air blower is engineered for efficient dust and debris removal in various professional environments. Featuring a powerful 600W motor, it delivers high-volume airflow suitable for cleaning hard-to-reach areas. The unit includes variable speed control, allowing operators to precisely adjust the blowing rate for specific tasks, while its lightweight, ergonomic design ensures comfort during extended use.

## Technical Specifications

### Input Power

**600 W**

Power Rating

Rated Voltage	220-240V
Frequency	50 Hz
No-load Speed	16000 rpm

## Performance

Max Blowing Rate	4 m <sup>3</sup> /min
Key Features	Variable Speed, Dust Bag Included

## Packaging & Compliance

### Certifications

GS Approved

Packaging Type	Color Box
