

Electric Anchor Windlass for Marine Vessels

This electric anchor windlass is designed for 38/40/42mm chains. It offers working loads of 61.4/68.0/75kN and supporting loads of 365/402/442kN.

Product Overview

Robust Marine Anchoring Solution

This electric anchor windlass is engineered for reliable and efficient anchoring operations on marine vessels. Constructed from high-quality steel with a corrosion-resistant coating, it is designed to withstand harsh maritime environments. The unit features a powerful electric motor and a heavy-duty gear system, ensuring smooth anchor handling, while the integrated warping head adds versatility for mooring tasks.
