

Electric Angle Grinder for Metalworking and Construction

The angle grinder is a versatile power tool used for grinding, cutting, and polishing various materials. It features a high-speed motor that drives an abrasive disc or wheel and is used in metalworking, construction, and DIY projects.

Product Overview

Professional Electric Angle Grinder

This high-performance electric angle grinder is engineered for demanding metalworking and construction environments. It features a high-speed motor designed to drive abrasive discs and wheels efficiently through tough materials. With its compact form factor and adjustable safety guard, it offers both the maneuverability needed for precision tasks and the durability required for heavy-duty grinding, cutting, and polishing.

Performance Metrics

Core Functions

- Grinding
- Cutting
- Polishing

Key Applications

Metalworking, Construction, Rust Removal, Weld Smoothing, Tile Cutting, Stone Shaping

Design Features

Safety and Handling

Adjustable Guard • Compact Design • High-Speed Motor
