

Electric Arc Furnace Concrete Cover

Precast concrete cover designed for electric arc furnace applications. It features integrated metal lifting hooks for handling during installation and maintenance.

Product Overview

Industrial EAF Concrete Cover

This precast concrete cover is specifically engineered for Electric Arc Furnace (EAF) applications in demanding steelmaking environments. The design features a robust circular structure with three central openings optimized for electrode access or ventilation requirements. Built to withstand extreme thermal conditions and mechanical stress, this component is an essential solution for maintaining furnace integrity and operational safety.

Design & Construction

Material	Reinforced Concrete
Design	Circular
Openings	3

Handling & Installation

Lifting Hooks	3
Handling Features	Integrated Hooks, Safe Handling, Easy Installation

Application

Industry Suitability
Steelmaking • Heavy Industrial

Primary Application	Electric Arc Furnace (EAF)
---------------------	----------------------------

Performance

Key Performance Attributes

1 High Thermal Resistance	1 High Mechanical Stress Tolerance
-------------------------------------	--
