

Electric Ash Vacuum Cleaner

This electric ash vacuum cleaner is designed for efficiently removing cold ash from fireplaces, stoves, and barbecues. It features a robust metal container with a secure lid and flexible hose for reaching into tight spaces.

Overview

Efficient Ash Management

This 1200W electric ash vacuum cleaner is engineered for the efficient removal of cold ash from fireplaces, wood stoves, and barbecues. Featuring a robust iron tank and a high-efficiency HEPA filter, it ensures a clean and dust-free environment during maintenance. The unit includes a convenient blower function and a flexible hose system, making it an essential tool for maintaining heating appliances.

Performance Metrics

Input Power

1200 W
Power

Suction Power

20 KPa
Vacuity

Technical Specifications

Mains Voltage	230 V ~ 50 Hz
Suction Hose Diameter	30 mm
Suction Hose Length	1 m
Aluminum Tube Length	200 mm
Power Cord Length	2 m

Construction & Design

Tank Material	Iron
Tank Thickness	0.4 mm
Filter System	HEPA

Features

Key Features	Blower Function, Secure Clamping System, Integrated Handle, Dry Ash Only
