Product Overview

High-Pressure ATV Electric Sprayer

This versatile electric sprayer is engineered for high-pressure disinfection and agricultural applications. Designed for compatibility with ATVs, it allows for efficient liquid application across various terrains in gardens and fields. With options for 60L or 100L tank capacities, it provides a robust solution for pest control, fertilizing, and general spraying tasks.

Technical Specifications

Tank Capacity Options

- 60 Liters
- 100 Liters

Vehicle Compatibility

ATV • Towed Vehicles

Pump Type

High-pressure electric pump

Applications

Primary Applications

Agriculture, Garden Maintenance, Disinfection, Pest Control, Fertilizing

Quality & Compliance

Product Certifications

CE, GS, CCC, BSCI, ISO 9001, ISO 14001

Manufacturing Standards

Produced using CNC equipment with rigorous quality control from start to finish.

Commercial Terms

Service Options

OEM Welcome

Standard Lead Time

25-45 days (depending on order quantity)

Sample Availability

Samples available for quality identification; shipping typically within 1-7 days for non-electric components.
