

Electric Ball Valve for Automated Flow Control

This electric ball valve is designed for automated flow control in various industrial and commercial applications. It features a robust actuator for precise valve positioning and reliable performance.

Product Overview

Automated Flow Control Solution

This electric ball valve is engineered for precise automated flow control in demanding industrial and commercial environments. Equipped with a robust actuator, it ensures reliable valve positioning and consistent performance over time. The construction utilizes durable, corrosion-resistant materials, making it suitable for a wide variety of fluids and gases while maintaining a leak-proof seal for optimal system efficiency.

Technical Specifications

Valve Size	20-3/4"
Valve Type	Electric Ball Valve

Key Features

Performance Highlights

1 Leak-proof

Sealing Reliability

1 Robust

Actuator Durability

Applications	Industrial, Commercial, Fluid Control, Gas Control
