

Electric Battery Forklift M20

This electric battery-powered forklift has a lifting capacity of M20. It is designed for material handling and logistics operations with a vertical mast for lifting loads.

Product Overview

Electric Battery Forklift M20

The M20 electric battery-powered forklift is engineered for efficient material handling and logistics operations. Designed with a vertical mast for versatile lifting heights and durable tires suitable for both indoor and outdoor environments, it provides reliable performance for warehouse and industrial applications. The unit features a protective overhead guard and a comfortable operator seat to ensure safety and productivity during long shifts.

Key Metrics

Lifting Capacity

2000 kg

Model Capacity

Technical Specifications

Power Source	Electric Battery
Recommended Applications	Warehouse, Logistics, Construction, Industrial

Features

Operator Comfort & Safety

- Protective overhead guard
- Ergonomic operator seat

Operational Capabilities

Indoor Use • Outdoor Use • Vertical Mast Lifting • Palletized Cargo Handling
