

Electric Bell Buzzer - 220V, 5W

This is an electric bell buzzer operating at 220V with a power consumption of 5W. It features screw-mount terminals for secure installation and also has ventilation slots.

Product Overview

Professional Electric Signaling

This electric bell buzzer is designed for reliable alert and notification applications in industrial and commercial environments. Operating efficiently at 220V with a low power consumption of 5W, it provides a dependable acoustic signal. Its robust design features integrated ventilation slots and secure screw-mount terminals to ensure stable, long-term installation.
