

Electric Belt Sander for Woodworking

This electric belt sander is designed for woodworking and material removal. It features a compact design, adjustable belt tracking, and a powerful motor for efficient sanding.

Product Overview

Professional Electric Belt Sander

This electric belt sander is engineered for precision material removal and surface preparation in woodworking applications. With its compact design and powerful motor, it enables efficient shaping and smoothing of various wood surfaces. The unit features adjustable belt tracking to ensure consistent performance for demanding professional projects.

Technical Specifications

Model ID	CYDD-DD-76
Tool Type	Electric Belt Sander
Applications	Woodworking, Material Removal, Shaping, Finishing

Features

Advanced Features

- Compact and ergonomic design
- Adjustable belt tracking system
- High-performance motor for heavy-duty sanding
