

Electric Bicycle Battery Pack

This high-capacity battery pack is designed for electric bicycles. It features a robust aluminum casing for durability and thermal management.

Product Overview

High-Performance E-Bike Power

This high-capacity battery pack is engineered specifically for electric bicycles, offering reliable power delivery for extended riding ranges. Built with a robust aluminum casing, it ensures superior durability and effective thermal management during operation. Designed to integrate seamlessly with compatible e-bike systems, this unit utilizes advanced lithium-ion cell technology to provide consistent performance.

Technical Specifications

Casing Material	Aluminum
Cell Chemistry	Lithium-ion
Thermal Management	Yes
Primary Application	Electric Bicycles, E-Bike Systems
