

Electric Bicycle Folding Frame

This is a folding frame designed specifically for electric bicycles. Its foldable design allows for easy storage and portability, making it ideal for urban commuters.

Product Overview

Versatile Folding Design

This portable folding frame is engineered for maximum convenience, offering a compact solution for storage and transport. Featuring a sturdy construction with a smooth, durable surface, it is designed to handle demanding tasks while remaining easy to set up and fold away. Its lightweight yet robust build makes it an ideal choice for space-constrained environments.

Design & Build

Portability

Fold-flat design • Portable • Space-saving
