

Electric Bicycle Front Fork Suspension Assembly

This front fork suspension assembly is designed for electric bicycles. It provides a smooth and controlled ride through its complex arrangement of linkages and suspension components.

Product Overview

High-Performance Suspension Assembly

This front fork suspension assembly is engineered specifically for the rigorous demands of electric bicycles. Featuring a robust linkage design, it offers superior shock absorption to ensure a smooth, controlled ride even on challenging terrain. Constructed from high-strength metal, the assembly provides essential mounting points for braking systems and fenders, making it a reliable upgrade for e-bike performance and safety.

Technical Specifications

Key Features

- Integrated linkage suspension system
- Durable metal construction
- Universal brake mounting points
- Fender attachment provisions

Finish

Dark Finish • Corrosion Resistant

Material

Metal (Steel/Aluminum Alloy)

Compatibility

Electric Bicycles, E-Bike Upgrade
