

Electric Bicycle Ignition Coil

This ignition coil is designed for electric bicycles. It provides reliable spark and efficient combustion for optimal engine performance.

Product Overview

High-Performance Ignition Solution

The YDG-001 ignition coil is a high-performance component specifically engineered for electric bicycles. Designed to provide a reliable spark, it facilitates efficient combustion and optimal engine performance. Its durable construction ensures long-lasting operation even in the most demanding riding environments.

Technical Specifications

Key Features

- Reliable spark delivery
- Efficient combustion optimization
- Durable, rugged construction

Model Number

YDG-001

Application

Electric Bicycle
