

# Electric Bicycle Motor Controller

This electric bicycle motor controller is designed for efficient and reliable motor control. Its features include a robust aluminum housing for heat dissipation and environmental protection, multiple wire connections, and a compact form factor.

## Overview

### RKD30 Series Controller

The RKD30 series electric bicycle motor controller is engineered for high efficiency and reliable motor management. Featuring a robust aluminum housing, it ensures superior heat dissipation and durable environmental protection. Its compact design allows for seamless integration into various electric bicycle configurations, making it a versatile solution for professional assembly.

## Technical Specifications

Housing Material	Aluminum
Key Design Features	Heat Dissipation, Environmental Protection, Compact Form Factor

## Compatibility

Application Range	Electric Bicycle Components
