

Electric Bike Battery

High-performance batteries designed for electric bikes. Available models include 3-DZM-12, 6-DZM-12, 6-DZM-20, and 6-DZM-24, with varying voltage and rated capacity.

Overview

High-Performance Electric Bike Batteries

These high-performance batteries are specifically engineered for electric bike applications, offering reliable power delivery and durability. Designed to meet various power requirements, the series includes multiple models ranging from 12AH to 24AH capacities. Each unit is built to standardized dimensions to ensure compatibility and ease of integration for electric mobility solutions.

Technical Specifications

Available Models

Model	Voltage	Capacity
3-DZM-12	12	12
6-DZM-12	12	14
6-DZM-20	12	20
6-DZM-24	12	24

Rated Voltage

12 V

Voltage

Physical Characteristics

Measured in mm, Weight in kg
