

Electric Bike Sealed Lead-Acid Battery

Sealed lead-acid battery designed for electric bike applications. It provides reliable power for electric bicycles and similar electric vehicles.

Product Overview

Reliable Power for Electric Mobility

This sealed lead-acid battery is engineered specifically for electric bike and scooter applications, offering a robust and maintenance-free power solution. Designed for longevity and consistent performance, it ensures reliable operation for various electric vehicle types. Its durable construction meets the demanding requirements of daily cycling and commuting.

Technical Specifications

Model	6-DZM-12
Nominal Voltage	12 V
Capacity (20HR)	12 Ah
Max Initial Current	3.6 A

Charging Guidelines

Cycle Use Voltage	14.4 - 15.0V
Float Use Voltage	13.5 - 13.8V

Features & Safety

Maintenance

Maintenance-Free

Safety Warnings

- Do not short circuit
- Recycle battery after end of life
- Return to authorized dealer
